Keep warm in the cab this winter*

Keeping warm in the cab does not have to cost much at all. After all engines were made for hauling, not heating. Stop idling to keep warm – simply switch off your engine and switch on your heater. The Eberspächer AIRTRONIC D2 diesel heater will keep you warm on the road, produces maximum heat in four stages, whilst running totally independent of the engine. It is fully automatic, extremely power efficient and quiet to operate.

Eberspächer
FIRST CLASS IN MOTORHOMES

RRP \$1685 inc GST
